Application No.: 10/538,879 Docket No.: SONYJP 3.3-1038

IN THE CLAIMS

1. (currently amended) An electronic apparatus having one or more functions on which use limitations can be imposed, comprising:

a processor operable to execute said one or more functions;

storage operable to store contents of use limitations for said one or more functions, the processor being operable to reference a representation of said contents of use limitations stored in said storage to determine said contents of use limitations for said one or more functions, and being operable to execute said one or more functions only as permitted by said contents of use limitations; and

an infrared light receiving unit operable to receive usepermitting key information transmitted by infrared communication
from an external mobile terminal having a wireless communication
function, having an infrared ray communication function and
operable to connect to a source of use permission over a network,
wherein the use-permitting key information is acquired by the
external mobile terminal from a source of use permission which
transmits the use-permitting key information over a network
responsive to a request for contents of use permission transmitted
from the external mobile terminal over the network based on input
of request for contents of use permission information by a user to
the external mobile terminal, and wherein said contents of use
limitations are derived from said use-permitting key information.

2. (previously presented) The electronic apparatus according to claim 1 wherein said contents of use limitations
